Security Compliance Software (continued)

Security Compliance Software Definition

This page was last updated on June 9th, 2025

Security compliance software helps companies document their compliance with cybersecurity frameworks in order to pass security audits. These tools enable information security or compliance teams to evaluate and manage their security processes. It helps ensure they comply with internal controls and industry or regulatory security frameworks such as GDPR, SOC2, PCI DSS, ISO 27001, ISO 27002, FedRAMP, NIST 800-171, NIST 800-53, NIST Cybersecurity Framework, and more. These tools also enable security and compliance analysts to assess company systems and policies, and document or identify areas of compliance and noncompliance.

Undergoing a security audit can be both time consuming and an internal resource-intensive endeavor. Security compliance software can ensure gathering compliance information is collaborative, correct, complete, and in the format required by auditors.

There are some similarities between security compliance software and governance, risk, and compliance (GRC) platforms. However, GRC platforms focus on identifying financial, legal, and all other liabilities, not cybersecurity risks. There is also some overlap between security compliance software and cloud compliance software, as the latter offers continuous infrastructure monitoring to identify security risks. This functionality can be a component of automated evidence collection in security compliance software.

To qualify for inclusion in the Security Compliance category, a product must:

- Offer pre-mapped and up-to-date templates for security frameworks such as SOC2, ISO 27001, and PCI-DSS, etc.
- Collect security compliance evidence and other documentation either through guided workflow or automation via system integrations
- Conduct risk assessments and provide risk mitigation insights
- Generate reports using predefined templates

Enterprise Security Compliance Grid® Scoring Description

Products shown on the Enterprise Grid® for Security Compliance have received a minimum of 10 reviews/ratings in data gathered by November 04, 2025. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

- Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include: Secureframe, AuditBoard, JumpCloud, and Hyperproof
- High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: Apptega, Scrut Automation, and Complyance
- Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: Vanta, Drata, LogicGate Risk Cloud, Resolver, and Ubuntu
- Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: Sprinto, ISMS.online, Copla, and Scytale

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the Security Compliance category algorithmically based on data sourced from product reviews shared by G2 users and data sourced from third parties.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis.

Segmented Grid® Scoring Methodology

When viewing a Grid® by segment size, the same Grid® scoring methodology applies. However, the review data used is only from reviewers who are employed by a company within a particular company segment.

G2 uses the following definitions for company segments:

- Small-Business Review: A review from someone who works at a company with 50 or fewer employees
- Mid-Market Review: A review from someone who works at a company with 51-1,000 employees
- Enterprise Review: A review from someone who works at a company with 1,001+ employees

Grid® Scoring Methodology

The Grid® Report for Security Compliance | Winter 2026 is based on reviews collected through November 04, 2025. We apply unique algorithms to this data to calculate Satisfaction (v4.0) and Market Presence (v7.0) scores for the Winter 2026 report quarter. To view the Security Compliance Grid® with the most recent data, please visit the Security Compliance page. For more details on Grid® Scoring, please view the G2 Scoring Methodology here.

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available categorization methodology. All products appearing on the Grid® have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A list of standard definitions is available to G2 users to eliminate confusion and ease the buying process.

Grid® Methodology (continued)

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and third-party data collected by G2 up through November 04, 2025. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

Trust

Keeping our ratings unbiased is our top priority. G2 follows defined community guidelines to ensure privacy, and authenticity for users and reviews. For more details, please view the G2 Community Guidelines here.

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to suggest its addition to our Security Compliance category.

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.
