IT Risk Management Software (continued)

IT Risk Management Software Definition

IT risk management software protects business data against all risks associated with the use of software and hardware. This type of software is used to identify, assess, and mitigate IT risks across all business entities of a company. IT risk management solutions also help companies ensure the security and privacy of customer or supplier data. Organizations use IT risk management to comply with governmental regulations and internal policies related to data security. This type of software is implemented by IT departments and can be used by all employees. IT risk management can be deployed as part of a broader governance, risk, and compliance system.

IT risk management systems need to consolidate data from multiple sources and integrate with solutions for IT infrastructure, IT management, and security. When deployed as a standalone product, IT risk management software integrates with governance, risk, and compliance software and other risk management software.

To qualify for inclusion in the IT Risk Management category, a product must:

- Provide tools to identify, assess, and classify IT risks
- Deliver scoring and ranking methods to track risk severity
- Include standard templates for audits and other IT risk processes
- Provide workflows to manage IT risk plans and tasks
- Create IT risk tests such as vulnerability and penetration
- Monitor the performance of the IT risk management activities
- Include reports and documents for compliance purposes

IT Risk Management Grid® Scoring Description

Products shown on the Grid® for IT Risk Management have received a minimum of 10 reviews/ratings in data gathered by November 04, 2025. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

- Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include: UpGuard, AuditBoard, Sprinto, Scrut Automation, Apptega, SAP Risk Management, Hyperproof, and Fastpath
- High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: Pirani, RealCISO vCISO Platform, GlobalSuite, ZenGRC, CIMCON Software, DORA REGISTER, Soterion, and Integrated Management System (IMS)
- Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: IBM OpenPages, SecurityScorecard, Azure Policy, Network Detective Pro, SAFE, LogicGate Risk Cloud, Resolver, VulScan, Oracle Risk Management Cloud, and OneTrust Tech Risk & Compliance
- Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: MasterControl Quality Management System, SAI360, ScalePad ControlMap, VGS Platform, Portnox, Camms GRC, Whistic, Diligent One Platform, StandardFusion, SureCloud, Ostendio, TruOps, LogicManager, ARCON | Secure Compliance Management (SCM, 6clicks, Strongpoint, Apparity, Lime, and Acuity Risk Management

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the IT Risk Management category algorithmically based on data sourced from product reviews shared by G2 users and data sourced from third parties.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis.

Grid® Scoring Methodology

The Grid® Report for IT Risk Management | Winter 2026 is based on reviews collected through November 04, 2025. We apply unique algorithms to this data to calculate Satisfaction (v4.0) and Market Presence (v7.0) scores for the Winter 2026 report quarter. To view the IT Risk Management Grid® with the most recent data, please visit the IT Risk Management page. For more details on Grid® Scoring, please view the G2 Scoring Methodology here.

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available categorization methodology. All products appearing on the Grid® have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A list of standard definitions is available to G2 users to eliminate confusion and ease the buying process.

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and third-party data collected by G2 up through November 04, 2025. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

Trust

Keeping our ratings unbiased is our top priority. G2 follows defined community guidelines to ensure privacy, and authenticity for users and reviews. For more details, please view the G2 Community Guidelines here.

Grid® Methodology (continued)

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to suggest its addition to our IT Risk Management category.

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.
